

Vita Mamba School Snack

Vita Mamba is a nutritious school snack appropriate for all children over the age of three. It is a peanut and soy based paste designed to address micro-nutrient deficiencies in children that stunt physical and cognitive development. A single serving of Vita Mamba is packed with energy, protein, fatty acids, and essential vitamins and minerals like iron, iodine, and zinc.

1 in 5 children
in Haiti are
chronically
malnourished

It is calculated that each dollar spent
on nutrition delivers between
\$8 and \$138 of benefits.

- ⇒ **Nutrient dense child sized snack portion**
- ⇒ **Just open and eat**
- ⇒ **Can be stored for up to 12 months**
- ⇒ **Easy to distribute to students**
- ⇒ **Affordable at only \$48 per student for a complete school year**
- ⇒ **Volume discounts available**
- ⇒ **Samples available upon request**

VITA MAMBA is a ready-to-use supplementary food (RUSF) for schoolchildren 3 years of age and older to complement foods available during school hours. VITA MAMBA was developed specifically to address nutrient gaps and prevent malnutrition.

It is a peanut, milk and soy based paste, fortified with vitamins and minerals, which may be lacking in the diets of school age children, including zinc, iron, iodine and vitamins A and B12. It also provides a source of energy, protein and essential fatty acids.

RECOMMENDED USE

VITA MAMBA is suitable for children 3 years of age and older and the recommended serving is 1 packet per day for each child, on each school day of the year. This product should not be given to children less than 3 years of age. Children should wash their hands before eating. Packets should be stored in a clean location until consumed. If the entire package is not consumed when opened, the packet should be stored in a closed container and finished within 1 day.

The product is ready to eat from the packet and does not require cooking or dilution with water. VITA MAMBA can also be eaten with other food, but should not be mixed with steaming hot foods that can damage the vitamins and minerals. Children should be encouraged to eat a variety of other foods throughout the day in addition to this snack.

Allergen warning: contains peanuts, dairy, and soy.

LOGISTICS

Each box contains approximately 250 packets of VITA MAMBA. Boxes of product should be stored in a clean, cool and dry (at or below 86°F / 30°C) location.

The shelf-life is 12 months from date of manufacture - a "best-before" date (BB) is stamped on each packet and box. Boxes should not be stored more than 8 high and pallets should not be stacked.

INGREDIENTS

Peanuts, soybean oil, sugar, whey powder, soy flour, soy protein concentrate, stabilizer (hydrogenated vegetable oil), maltodextrin, vitamin and mineral complex.

NUTRITIONAL VALUE OF VITA MAMBA

	Per 100g of product		Per 50g Serving		Per 100g of product		Per 50g serving
