Meds &amp; Food For Kids

Vita mamba is a ready-to-use supplementary food for schoolchildren 3 years of age and older to complement foods available during school hours. Vita mamba was developed specifically to address nutrient gaps and prevent malnutrition. It is a peanut and soy based paste, fortified with vitamins and minerals, which may be lacking in the diets of school age children. Including zinc, iron, iodine and vitamins A and B12. It also provides a source of energy, protein and essential fatty acids.

## Use

### Recommendations for use

The product is ready to eat from the sachet and does not require cooking or dilution with water. Vita mamba can also be eaten with other food – such as bananas, bread, corn, or rice – but should not be mixed with steaming hot foods that can damage the vitamins and minerals. Children should be encouraged to eat a variety of other foods throughout the day in addition to this snack.

### Dosage

Vita mamba is suitable for children age 3 years and older, and the recommended servings is 1 sachet per child per school day during the year.
