Vita mamba is a ready-to-use supplementary food for schoolchildren 3 years of age and older to complement foods available during school hours. Vita mamba was developed specifically to address nutrient gaps and prevent malnutrition. It is a peanut and soy based paste, fortified with vitamins and minerals, which may be lacking in the diets of school age children. Including zinc, iron, iodine and vitamins A and B12. It also provides a source of energy, protein and essential fatty acids.

Use

The product is ready to eat from the sachet and does not require cooking or dilution with water. Vita mamba can also be eaten with other food – such as bananas, bread, corn, or rice – but should not be mixed with steaming hot foods that can damage the vitamins and minerals. Children should be encouraged to eat a variety of other foods throughout the day in addition to this snack.

Dosage

Vita mamba is suitable for children age 3 years and older, and the recommended servings is 1 sachet per child per school day during the year.

Storage

- It is recommended to use Vita Mamba within 12 months from the manufacturing date. After opening, the sachet has to be consumed within 24 hours.
- Vita Mamba is packaged under protective atmosphere. The sachets are air and humidity tight.
- Each box contains 280 sachets of Vita Mamba. It is recommended to keep the product in a dry and cool place, at a temperature below 30°C (86°F), away from direct sunlight.
- It is recommended not to stack the pallets.

Ingredients

Vegetable oil (soy), defatted soy flour, sugar, peanuts, whey powder, stabilizer (fully hydrogenated vegetable fat, mono and diglycerides), vitamin and mineral complex. Allergens: peanuts, soy and milk products. Does not contain any ingredients of animal origin, except dairy products.
