## **Meds & Food for Kids Environmental Conservation Policy**

Meds & Food for Kids (MFK) recognizes the need to protect the natural environment. MFK provides policies that enable a safe, healthful workplace, protect the environment, and conserve energy and natural resources. With these policies in place, we believe that we can achieve a healthy and safe environment. We are committed to and will:

- Provide a safe and healthful workplace and ensure that personnel are properly trained with the appropriate safety and emergency equipment.
- Be an environmentally responsible neighbor in the community where we operate, and correct incidents or conditions that endanger health, safety, or the environment.

This includes, but is not limited to:

- Treating the drinking water at the facility and minimizing groundwater use whenever possible
- Managing the facility's wastewater in a responsible manner
- Minimizing carbon emissions by subsidizing the use of public transport and carpooling with our employees
- Using solar energy to generate up to 100% of the factory's electricity needs
- Develop and improve operations and technologies to minimize waste and other pollution, encourage recycling, minimize health and safety risks, and dispose of waste safely and responsibly.
- Incorporate soil erosion techniques, water conservation, and aflatoxin training in farmer training programs to ensure a healthy future for Haiti and its agricultural communities.

Promptly correct any practice or condition not in compliance with this policy.
